Features & Benefits

THE BEST CHOICE FOR CEDAR SHINGLE SIDING

Wrap Your Dreams® in The Premier Panel™

Our philosophy at Premier Forest Products, Inc. is to invest in long-term business relationships by providing premium products, fair pricing and customer loyalty. Since 1967, we have specialized in manufacturing a wide range of premium products for our customers worldwide.

The Premier Panel™ – Classic Design.

The Premier Panel™ (patent pending) is a major breakthrough in shingle panel design. Designed after the classic and traditional method of installing individual shingles, Premier's two ply "Cedar on Cedar" shingle panel is the only shingle panel available with a naturally durable Western Red Cedar backer-board. Real Cedar key-ways and a full coverage overlapping backer-board are just two of the many important features of the Premier Panel™ that also include premium "A" grade shingles manufactured from 100% Vertical Grain, Clear Heartwood

Western Red Cedar. Premier's shingles are band sawn, rebuted and rejoined providing optimum architectural appeal and superior finish performance.

The Premier Panel™ – Rain Screen Design.

Committed to new, green and innovative solutions for our customers, architects and the building industry, Premier took the same great features of the Classic Panel and developed a cutting edge Rain Screen Panel by adding factory installed Moisture Guard™ furring strips to the back of the cedar backer-board. The furring strips, located 16" on center, provide a vertical drainage plane to vent and drain trapped moisture by creating a continuous 3/8" air space behind the siding. Premier's patent pending rain screen design provides a thermal and capillary break, equalizes pressure within the wall system, optimizes insulation performance and increases R-value resulting in a green and energy efficient siding system. Rain screen design also enhances the performance of finishes, combats mold, mildew and corrosion and extends the longevity of the siding and building envelope.

Exposures and Styles. Premier's Classic and Rain Screen Panels are eight foot in length and available in 5" and 7" exposures and four styles including; 5" Even Butt, 7" Even Butt, 7" Thick Even Butt (1/2" Shingle Butt) and 7" Staggered Butt patterns. Specialty custom exposures and styles can also be manufactured on a special order basis. A full line of Premier Panel™ accessories, including Fancy Butt Decorator Shingles, Individual Inside and Outside Flush Shingle Corners, Solid Wood Corners, Door & Window Trim, Fascia, Vented Starter Strips, Vented Furring Strips and much more are available.
